1991 TOBACCO YEAR IN REVIEW

South Carolina tobacco producer sales soared to a six-year high during the 1991 marketing season.

During the 51 sales days from July 17 through Oct. 16, producer sales totaled 101,841,244 pounds for \$174,660,888.52 and an average per 100 pounds of \$171.50. These totals were compiled from figures supplied the South Carolina Department of Agriculture weekly by the 25 tobacco warehouses on the state's seven markets.

The previous highest total sales mark was \$175,211,168.68 in 1984. The average per 100 pounds was the top total since the \$172.67 reported for 1985.

From the beginning until the end, weekly sales figures improved at a steady pace. The first weekly average was \$158.17 per 100 pounds and the total moved into the \$170 plus range after five weeks and remained there until dipping to \$168.26 for the final sales week.

Favorable growing conditions prevailed throughout most of the late winter and spring months for the '91 crop. Good moisture conditions in January and February helped get the crop off to an excellent start. With mild weather and shower conditions in April, transplanting of the crop proceeded at an advanced rate. Dry conditions came at the right time in early June to allow plants to take deeper roots. Harvesting got underway in late June and picked up during the early days of July although wet conditions during the month did manage to delay field activities in some producing areas. Showers continued to hamper the crop in its final harvesting stages.

The Tobacco Market News of the USDA's Agricultural Marketing Service's Tobacco Division reported an increase in grade averages and quality for the '91 crop.

"Favorable weather conditions in most areas had a positive impact on desirability of offerings," noted the Market News Service. "Just over 95 percent of all grade averages were higher than the year before with most heavy volume offerings increasing mainly six dollars to eight dollars per hundred pounds. The practical top price for the season was \$187 as compared to \$185 per hundred in 1990. The make-up of tobacco offered for sale improved from last year with the percentage of good and fair quality increased on auction floors as low and poor quality decreased. From a color standpoint, tobacco designated as mature to mellow increased 11 percentage points to 63 percent while unripe or immature decreased the same amount to 28 percent."

Flue-Cured Stabilization Corporation receipts for the season on the South Carolina Border North Carolina Flue-Cured Tobacco Belt amounted to 9,668,655 pounds or 5.1 percent of net sales. In 1990, 26.3 million pounds were accepted under the loan, a total of 13.7 percent of net sales.
